

My Digital Manifesto

A Personal Commitment to an Intentional Life

This document is my personal compass. It is not a rigid contract, but a living, gentle reminder of the life I am choosing to build, day by day. I will consult it often to reaffirm my intentions and adjust my course when necessary.

1. The Purpose of Technology in My Life

I define what my main tools are for. They are not for killing time; they are for building a better life.

2. My Non-Negotiable Boundaries

I establish these golden rules to protect my peace, my rest, and my relationships.

3. How I Will Protect My Focus

I define my personal strategy for deep work and uninterrupted creativity.

4. What I Will Fill the Reclaimed Space With

I consciously choose the analog activities that nourish me and connect me to the real world.
